EDUCATION

Bachelor of Technology

Rajagiri School of
Engineering & Technology

(2024 - 2028)

High and Middle school Diploma

Christ Vldyanikethan School

(2010-2024)

SKILLS

- Data Structures and Algorithms
- Object Oriented Programming
- Programming in C and Java
- Python Programming
- Web Development

LANGUAGES

- English
- Malayalam
- Hindi

REFERENCE

Available upon request

PROFILE

Highly motivated and result driven BTECH Computer Scieence student with a strong passion for coding and problem-solving. Proficient in range of programming languages and technologies with a solid fooundation in data structure, algorithms and software development principles. Eager to apply technical skills and contribute to innovative projects in a dynamic and challenging environment.

CAREER OBJECTIVE

To apply my growing knowledge of computer science in a practical environment where I can learn from real-world challenges, contribute to meaningful projects, and steadily improve my skills. I aim to build a career where I can combine problem-solving, teamwork, and continuous learning to make a positive impact while developing both personally and professionally

PROJECT AND EXPERIENCE

APP DEVELOPMENT

My team developed a web application designed to facilitate collaborative travel planning for groups. The platform was engineered with features that integrate real-time alerts and robust communication tools, ensuring all participants remain synchronized throughout the planning process.

SCALABLE WEB SERVICE FOR A PHOTO SHARING APPLICATION

I designed and implemented a cloud architecture to handle an increasing user base for a photo-sharing application. This involved building a secure, single-region infrastructure that uses auto-scaling to manage traffic and leverages object storage for efficient data management.

GAME DEVELOPMENT

During a competitive game jam, I independently developed a fully-featured game using the Unreal Engine. This project highlighted my technical proficiency and ability to execute the entire development cycle, from concept to completion, under a strict time constraint.
